

NEW

EP WINCH

EP WINCH is a system specifically designed for driving winches that find applications, for example, in tower cranes and winder machines.

EP WINCH is an innovative solution that, thanks to its advanced design, ensures a high level of reliability and

guarantees high standards of productivity due to its wide range of allowable speeds. The Winch rotating housing gearbox is mounted directly inside the drum, reducing the overall winch dimensions and improving the system integration.

Features

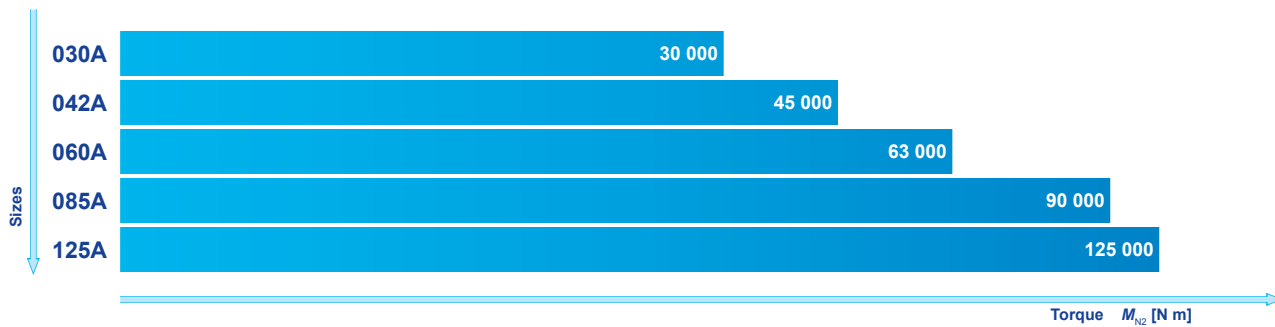

Benefits

Compact design	→	Suitable for all winch applications
Modular system	→	Easy installation and maintenance
Flexible design	→	Suitable for both electrical and hydraulic motors
DNV Type Approval	→	Suitable for marine applications
Cutting-edge design	→	Very high speeds allowed

Technical specifications

- 5 sizes (030A ... 125A)
- Torque up to 125 000 N m
- Suitable for both electric and hydraulic motors
- Hydraulic parking brakes available
